

Smooth Bromegrass

MAXIMIZING FORAGE DIGESTIBILITY AND YIELD USING BIOLINE[®] GOLD FULVIC ACID

Smooth bromegrass is very responsive to nitrogen fertilization and requires a high level of fertility for maximum production. Adding BioLiNE[®] Gold to your Smooth Bromegrass fertility program improves the transport and assimilation of nutrients ensuring that you get more from your fertility. Our BioLiNE[®] Gold is known for its compatibility with other inputs, and ease-of-use. With low usage rate requirements, our versatile solutions drive nutrients to your crops.

BENEFITS OF ADDING BIOLINE[®] GOLD FULVIC ACIDS TO YOUR NITROGEN FERTILIZERS

- BioLiNE retains and exchanges essential nutrients with the roots. It eliminates stress from high concentrations of soluble nitrogen (nitrogen burn), enhances the microbial ecology in the rhizosphere (root zone) and improves root development amplifying nutrient uptake.
- BioLiNE Gold enhances the bioavailability of soil nutrients and helps to feed plant-beneficial microorganisms.

PROPER MANAGEMENT OF SMOOTH BROMEGRASS

Nutrition alone won't always result in improved productivity. You also need to use some best practices to manage your Smooth Bromegrass. Below are some key tips to manage your pasture:

- Avoid mowing or close grazing at the **jointing stage** of growth, it may destroy the growing points and slow the regrowth of your pasture.
- Harvest or clip pasture when seed heads emerge. This will assure quality of forage and quick regrowth of the new crop.
- If your grass is to be grazed/harvested in both the fall and spring, it is best to split your nitrogen application to maintain adequate growth and quality for the fall crop.

Smooth Bromegrass

INCREASE QUANTITY AND QUALITY OF YOUR SMOOTH BROMEGRASS THRU PROPER MANAGEMENT AND BIOLINE GOLD.

For Smooth Bromegrass management; **apply BioLiNE Gold @ 10 oz per acre.**

Recommend applications after start of regrowth, every time the grass/hay has been harvested, or grazed down.

BioLiNE Gold May be applied with most foliar fertilizer, insecticides, herbicides, and fungicides. BioLiNE Gold may be impregnated onto fertilizer or added to liquid fertilizer.

When it comes to nutrient management for your pasture, BioLiNE® Gold is the go-to-tool in your toolbox.

BioLiNE® Gold suggested retail pricing:

\$39.95 per gallon

\$4.99 per pint

\$3.12 per 10 oz
